

What is claimed is:

1. A size tag clip comprising :

a protruding plate having two symmetrical top surfaces which have downward sloping protrusions and having sides adjacent to a tip of the protruding plate to be perpendicularly cut surfaces while corresponding to the tip is a more tilted sloping surface which forms a ditch with a hanger.

2. The size tag clip as recited in claim 1, wherein an angle of the tilted sloping surface is greater than that of the downward sloping protrusions.

3. The size tag clip as recited in claim 1, wherein the protruding plate is connected to one side of a hanger.
